### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

### DETAILED ACTION

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors, e.g., typographical, grammar, idiomatic, syntax and etc. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 7-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a). Claim 8 is indefinite because it fails to point out what is included or excluded specifically by the claim language "in accordance with DIN EN 10 088-2".

b). Claim 10 reciting "a sheet metal" broadens the initially recited "steel" in claim 7, the claim from which it depends. Also the claimed "and produced by welding" provides ambiguity, i.e., evaporator tube produced by welding?

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohara et al (4,570,700) with or without EP 0 683 241.

Ohara discloses an evaporator tube having a wall thickness preferably from 0.3 mm to 0.4 mm which falls within the claimed "between 0.1 mm and 0.5 mm" as broadly claimed in claim 7. See e.g., col. 3, lines 50-58.

EP teaches a heat exchanger for used e.g., in a desalination system, which is formed of a steel that is corrosion resistant. To incorporate EP's teaching to Ohara would have been obvious to one of ordinary skill in the art inasmuch as Ohara suggests against corrosion; and so as to obtain the predictable result of improving the performance of the tube by reducing pressure loss in the tube. Note OHara at col. 1, lines 13-35.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a). Kastner et al discloses a steam generator formed of tubes.
- b). Vicklund et al discloses a heat exchanger with a heat transfer system.
